Software to Create Drawing Archives

Recording Index Data with OCR

Direct Database Transfer

Automatic Workflows

INTELLIGENCE FOR CREATING  
DIGITAL DRAWING ARCHIVES

## Capture

- Assemble Drawings from Various Sources
- Scans, TIF, PDF, CAD Files
- Independent from Sizes and Paper Formats

Choose your drawing files for a VPindex process to clean, index, and rename. All processing steps can be tailored to your individual requirements.

## Process

- Record Index Data from Title Blocks
- Record Index Data from Any Position
- Cleanup, Rotation, Paper Format Calibration

Literally, hundreds or even thousands of documents can be processed in short time. Set up automatic workflows or a combination of automatic and user controlled routines. Define templates and the program will capture text, barcode or checkbox content for database or DMS export. The built-in OCR module (text recognition) supports a simplified data capture. Content can be recorded from a title block or from any other position in the document.

DRAWING-ID	DRAWING-No
275611	DrW260AZ028-220.209
274224	DrW260AZ020-620.208
974125801	DRW140AZ005-211.002
974129001	DRW140AZ005-710.105
974114701	DRW160AZ022-835.101
974114801	DRW160AZ022-838.102

## Archive

- Export Index Data to Database, DMS, MS-Excel
- Rename Files Using Index Data
- Uniform Output File Format, Single or Multi-Page

Create, update or extend your digital drawing archive and database. VPindex will help you to archive, retrieve and distribute your drawing documents faster and safer.

**INTELLIGENCE FOR CREATING  
DIGITAL DRAWING ARCHIVES**

With VPindex and VPindex lite you can capture, index, clean and archive legacy scan or CAD documents quickly and safely - independent of paper sizes and formats. You can build up new digital archives and databases or fill your existing storage system with yet uncaptured documents and their associated individual content data. With a unique identification of each processed document your workflows will definitely speed up for retrieval, revision, distribution and printing.
